

How Can We Save Water?

Water is a blessing from Allah, so we must not waste it.

Collect rain water in buckets and use to water your garden.

Instead of leaving the tap water running when you brush your teeth, or do wudhu, turn it off and use a little at a time.

We made from water every living thing. (Quran 21:30)

Water is running out in some parts of the world. Try and save water so there is enough for everyone.
